Find < > Aa Ab .*? EMI

SNR Before (Pre-Filter)

$P_s = \text{mean}(\text{signal}.^2) = \dots [\text{value}]$
 $P_n = \text{mean}(\text{emi}.^2) = \dots [\text{value}]$
 $\text{SNR_before} = 10 \cdot \log_{10}(P_s/P_n) = 12.45 \text{ dB}$

SNR After (Post-Filter)

$\text{filtered} = \text{lowpass}(\text{received}, 1500, f_s)$
 $P_n_after = \text{mean}((\text{filtered} - \text{signal}).^2) = \dots [\text{value}]$
 $\text{SNR_after} = 10 \cdot \log_{10}(P_s/P_n_after) = 26.81 \text{ dB}$
